## Findings and recommendations of the study in brief.

### Observations and findings :-

- The single headed families which I met some of them are facing severe problem of insufficiency of food grains it might happens due to they belong to primary households.
- Issue of irregularity, many respondent told that their dealer hasn't provide food grains regularly.
- The food grains which has to be provide at their door ( for pvtg single headed only) at most of the places hasn't happens.
- Many of the persons whom I met are happy with the current PDS suply and they don't want any alternatives.
- Out of my 30 respondents there are some really needy persons who are unable to taking care of themselves and they are continuesly depends on others help.
- Some of them are old age and disabled and they desperetlly seeking for some concret solution for their livelihood.
- The most of these people are lived far away from the block head quarters and that's why they can not reached often to the office to told their problems to the officials many of them are lived in a extremly remot areas of the state such as border and hilly areas of the state.
- The single headed person who belong to PVTG they get a enough food grains but apart from that they are not able to cooked their food due to disability.
- One of the respondent whom I met at Haludbani her house are broke down in the last year, and she is more than 65 years old and very weak she asked me for help to repair her home.
- I met with some of goverment officials and I was surprised that what exactly these officials think about the people like this who alredy suffered with their lives. But when we met with Mr Amar Kumar SDO of Ghatshila he change my views towards the state officials that everyone hasn't on same page. He was very serious about our findings and the problems which faced by these people, he ensure us that as of now the every beneficiary of the single headed household and especially those are eligible to get pensions he will resolve their problem with imegiate action.
- One of the my observation is, in the some of cases the respondent are alone from fast many years they are not able to taking care of themselves but their relatives helped them in the sort of serving food and other help. Whether the relatives hasn't pretty much intention to feed them but due to societal pressure they did that and it was shows that how strong our Indian tradition is.
- The family which has only 3 minor children no budy their to take care of them and no one even their relatives hasn't come forward to help them, only one of the school come forward and adopted them and took the responsnsibility for their education and lives.
- At the graound level no vigilance committee is active to cheaking whether the food grains are provided regularly or not.
- The fair price shopkeepers often did black marketing of kerocine oil because the people those has to ensure accountability aren't fullfil their responsibility.
- Many old age people are single only because of their families lived separately it was a contradiction with some other people helped to their single realtives.

- The knowledge about how to register the grievances is not much of that level it is nearly equal to zero, they don't have any idea about online grievance portal.
- In our portal there is also some minor defects such as no hyper link to upload, a language barrier, it is more technical and lengthy an option for registered user to log in again.

## Recommendations

- The people those are lived single and no one there to help them we can provide a cooked food through the MDM or Anganwadi centers. It helps to ensure their food security and providing them a minimum one time food which helps to reduce their hunger.
- Coordinate with the schools or Anganwadi centers, we have to encourage them to be part of this new initiatives, only one or two people from the village is seeking for help and these centers can easily accommodate them but for that we have to push them.
- For the irregularity we have to put pressure on the dealers that they should supply the food grains regularly and also we have improve our monitoring mechanism.
- The act has a mandate to provide a AAY card to the widow, disabled people but it hasn't come to the ground and the result of that PH card holder single headed person facing the severe insufficiency of the food grains. We have to correct this by giving them a appropriate ration card.
- While we providing the cooked food then we have to involve more and more panchayat members oftenly in this chain because only they can ensure at ground level that no one single headed households remain left without a food.
- [We can make strengthen and accountable the local vigilance committees through the "Gramsabha" which helps us to monitor and run this initiative.
- We can use the guidelines and functioning structure of gramsabha of the state of Maharashtra where the gramsabha has more power to make sarpanch (Mukhiya) more accountable.]<sup>1</sup>
- Incentives for those who help to the single headed households, but it only for other people not for relatives and family members.
- We have to launch a campaign to create awareness in the people about our online portal.
- Regarding online grievance and redressal portal we can select the common service centers as a agent where the people can file their grievances, because lot of people doesn't have the mobile phones.
- The common service centers should not charge more than rs 10 per complaint.
- A grievance and redressal officer should be appointed at block level and it should be the independent who can resolve the grievance with immediate effect.

---

# Introduction

The National Food Security Act, 2013 was launched to ensure food entitles to the 2/3 population of the nation it mandate to covers near by 70% of rural population and 50% of urban population. It has four main components and PDS is one of them, PDS has two prominent part first one is AAY households and second is PH households the act rectify the BPL households into AAY where they get a 35 kg foodgrains per households and PH households can get 5 kg/person foodgrains in the house at price of 3-5 rs per kg. The government has ensured the delivery of these entitlements by issuing orders from time to time pertaining to the regularity of delivery, maintenance of quality and nutritional value, provisions for non-compliance etc. The act also ensures the effective implementation of the scheme through various monitoring bodies viz. vigilance committee of local governing bodies and also the grievance and redressal system. To address grievances the act, in section 14, provides for the State government to put in place the internal grievance redressal mechanism such as helpline, call centers etc. Also, chapter VII clause 15 provides for the appointment of District Grievance Redressal Officer for every district with whom grievances can be lodged and redressed. Section 16 of the act instructs State governments to constitute a State Food Commission to monitor and review the implementation of the various schemes under the act and look at the grievances related to the various schemes under the act.

The state food commission of Jharkhand is constitute under the section 16 of the act in the year 2015, as of now it is working with the various grievances and monitoring of the act. The commission conduct the hearings and field visit to the various part of the state to ensure that every person those are eligible to get entitlements should not be left. The commission also take care of section 33 of the act which mandate if any state official especially related to grievances she/he failed to redressed that intentionally, then commission comes into action.

My study is for single headed households those are not able to taking of themselves due to old age, disability and other reasons then what should be the policy alternatives to the same. Whether these households belong to AAY or PH households what are the causes for this condition. I went to 4 blocks of the East singhbhum district and visited to 7 villeges. My recommendation is based on the major 5 case studies which I choose out of 30 repondents and it gives the scence of their actual condition and important of the policy alternatives.

## Objectives of the study

My study focused on the single headed households from AAY and PH households, and tried to geting scence of what kind of problems they faced while getting the food entitlements under the National food security act 2013. Mainly I focused on those people who are not able to taking care of themselves due to old age, disability and seperation of families and no one there to help them, then are the food grains is enough and meaning to them? When thses people are not able to cook that, then what should be the policy alternatives which can fullfile their needs and ensure their food security. Entitlements, status of transparency and accountability measures, responsability and issues in grievance redressal mechanism, issues in implementation. Based on these findings I [3] have made some policy recommendations for improving the life and food security of the single

headed households in the state of Jharkhand, with reference to the National Food Security Act, 2013.

As per the National Food Security Act, 2013 and various rules, guidelines and orders issued by the Government thereafter, there are various provisions for the effective implementation of the PDS scheme. Instructions for the monitoring and grievance redressal are also given in the act, rules, guidelines and orders passed by the government. Despite all these provisions it can be observed that at many cases especially in PH households the entitlements are not getting delivered and it is insufficient for them. What are the reasons behind this? Where are the gaps? And, how these gaps can be bridged? The aim of this study is to see and analyze the gaps in the current status of their lives and recommends the concrete policy solution for the same.

## Methodology

### 1. literature review :-

To get a better understanding of the problem the literature review is one of the most important aspects that helps us to understand the background of the problem. It can be a form of secondary data, annual reports and other. I use a literature such as act booklet commissions annual report, states letter of provision regarding the PDS scheme, secondary data of single headed households that commission has already deployed on their website, it helps me to understand what exactly the act has mandated and current scenario of the single headed households. From the booklet of the act I understood that section 3,8,15,16,29 and 33 is the pillar of the act and it should be implemented in a good manner.

### 2. Identify the problem and respondents :-

By using the literature and secondary data I identified the problem which I studied for 6 weeks and chose the 147 respondents those are in single in their families. These 147 respondents spread over more than 8 villages of East Singhbhum district of the Jharkhand state, out of these 147 respondents I was interviewed only 30 people due to time constraints and other limitations. But out of 30 people I choose only 5 case studies for my concrete recommendations which has most impactful concern that why they need a policy alternatives.

### 3. Field component :-

[4]

I choose the East Singhbhum district for my field visit, four main blocks identified as my primary field site that is Ghatshila, Chakulia, Dumaria and Dhalbhumgarh I

visited 7 villeges and one packeging center of these four blocks they are Ramchndrapur, Kenduaposhi, Haludbani and Gurajor [Ghatshila block], Bankati and Murathakura [Chakulia block], Kendua [Dumaria] and Dhalbhumgarh packeging center.

## Interviews of the respondents

To interact with the single headed households people I conduct the interviews at all 6 villeges of East singhbhum district where I tried to understand their problems. While talking with them people open up their life stories that why and how they are single in the family. Some stories are very heart touching and I felt that they really need a policy alternatives because many of them are not able to cook food for themselves. This experience was horrible and the first question come to my mind was whether we [state] provides them a food grains but if they are not cook that due to old age and disability then what is importance of that food grains. Some of them are fully depend on others help if they couldn't find anyone then...?

I attached my all interviews in the report which makes sence to you..<sup>2</sup>

## Observations and findings

When I started my field visit from the DGRO of the East singhbhum and follows the meeting with DSO they brief about the current status of the NFSA at the district. Aftger that I met with SDO of Ghatshila and BDO's of all four blocks. Some of them are very enthusiatic and edger to know what outcomes would be come from my study but on the other hand some are not sure about what they are taking about. One of the offical said "these people [Sabar community, many respondent of mine is from this community] are useless they don't have any ambitions" it was shocking for me. When I went to various villeges and talked with the single headed families then I realized that official has a prejudices towards this people. They are working regular [ some of them are not, this is for entire community]. On the basis of my observations I analyzed some major problems as bellow.

### Insufficiency and Irregularity :-

The single headed households whom I met they are facing severe shortege of food grains specially the PH households. AAY households facing the problem of irregularity, the most of my respondent from the Sabar community which lives in a remote areas which fully surrounded by the forrest and far away from the main block offices and also not aware about how to complain and to whom. They supposed to get a food grains at their door under "Dakhiya" yojana but they couldn't get that, this the main reason for their insufficiency of food grains. Whereas PH households get only 5 kg

---

2 See annexure 2 respondents interviews.

foddgrains per month and they asked me a question that how can anybody eat only with 5 kg foodgrains for entire month? And I was speechless.

## Dependancy :-

Thses single headed households are totally depend on the others help for their daily routine too some of them getting help from their relatives and some of getting help from neighbours or other community members. But that is also not a regular and when these people couldn't find a help from anyone then ? And that is a big question for us. We can reduced their over dependancy through some polcy interventions that I include in my recommendations.

## Disability :-

Out of my 30 respondents three single headed households are partially disabled due to various reasons and I include them in my case studies. They are not able to do any work and cook too and they needed alternatives a most.

## Unawareness :-

Near about evry respondents of mine is not aware about their rights regard to food security and also doesn't know that how to registered their grievance and supposed to whom. It might happen due to illiteracy but apart from that we have to campaing, because without that our online grievance and redressal portal hasn't gives a best results.

# Analysis based on case studies

My analysis is based on case studies which choose from my 30 respondents, out of these 30 respondents I only use 5 case studies here and information about other respondents are in form of data set. The data set will be gives you a enough clarification about their current situation and status of the PDS scheme it helps to improve the mechanism of the current status.

## 1. Fulmani Sabar 58 years [Haludbani, Ghatshila block]

She is a single headed household and my first case study, she is near to 58 years of age and don't remember that how long she is alone in the the family. She belong to PVTG households but apart[ from that she don't have a ration card and other welfare scheme documents such as job card, Ayushman Bharat card, pention passbook and others. When she started talking that she doesn't

take a regular food grains due to her ration card had been lost and even whenever the fair price shopkeeper gives her a ration [once in a 2-3 months] that is not enough to her. As she belong to PVTG group she has to get a food grain at her door but shopkeeper hasn't provide that and she is not able walk for a distance of 3km to reach at another villege [Rajabasa] to take food grains and no one helps her for that. It introduce a irregularity of food grains and also insufficiency, she got a home from government under Birsa Awas Yojana [BAY] but now that house is in broken condition<sup>3</sup> and she used a small shed for as home. She had never complain to anyone about irregularity and insufficiency of foodgrains because no one reach to her as of now.

#### Conclusion :-

whether she belong to Pvtg group but hasn't access regular to food grain which supposed to delivered at her door, it occurs a irregularity and insufficiency of foodgrains.

#### Recommendations :-

We should ensure that she get a food grains at her door under Dakhiya yojana because its acts mandate. Second thing is that every BAY house should be inspected in after every five years of period by the panchayat sevak.

## 2. Sharda Mahto 65 years [Kendua, Dumaria block]

65 years old lady is live alone since last 6 years she has disability<sup>4</sup> and due to that she is not able to do any work for earnig. She is totally depend upon the goverment aid which she get a form of rs 200 in every month as pention for disabled people. She told me that she get only 5kg rice / month and there is no irregularity she said "massi massi chaval paye" but isn't enough to her even if she get a food grains she is not able to cook for herself and that's true, how can a person who's disabled survive only with 5 kg rice in a month? She faced a severe insufficiency of food grains, when she told me that she always seeking for help from her sister who herself a widow and 55 years of age and her sister also a alone in her family I was amaze and shocked too, that only two alone women help each others and out of them one is disabled and second is widow. The National Food Security Act has a mandate that every single women, widow and disabled person should get a AAY card but these ladies hasn't got that, I thought it a violation of their food security. We have to react as soon as possible to ensure their food security. That will help them live their lifes with dignity and respect.

#### Conclusion :-

The single headed household and especially those are disabled and also suffer from insufficiency of food grains, the other person who helps her she is also widow and alone then we have to ensure their food security.

#### Recommendation :-

---

3 See annexure 3 house photograph

4 See annexure 4 photograph of mahto

We can enroll her name at MDM or Anganwadi center from where she can get a cook food and that will helps her as well as us to ensure a minimum one time food. We have to lounch a campaing for change the ration card [PH to AAY] of those people who are disabled, widow, and single women in the family.

### 3. Sumitra Sabar [Ramchandrapur, Ghatshila block]

She couldn't told me her age might be she hasn't remember that, but I guess she looks like more that 50 yeras of age. Since 10 yeras she is alone at home, even she don't have a home<sup>5</sup> too she always used to a community shed which government give them. Suffering from major disease from last 6 months and due to that she had lost a money too, when I was talked to her she replied me that she come back from a district hospital a couple of days ago. From last six months her neigbour helps her to cook food and surve to her, a day by day she become a very weaker than ago, as talking to her and other community members one thing is come up in the highliten that she really need a help from the state. If we failed to provide aid then her life become more dificult .

#### Conclusion :-

The people who has a severe disease and suffer from that we have to reach there it might be save her life. She is not only suffering from disease also unsufficient feeding of food.

#### Recommendation :-

As of now we can acommodate her to MDM scheme that will provide a cook food to her becuase no one told me that her neigbour provide a food to her a regular or not. Then we can provide others alternatives.

### 4. Duri Sabar 63 years [Bankati, Chakulia block]

She is from Bankati villege a very old age lady 63 years of age and her half of the body has been paralyzed due to [burn marks]<sup>6</sup> and living alone since last ten years. She cook a meals once in a day with the help of her neigbour sometime they helps and sometimes not whenever she couldn't find someones help she use to slept without food. She also belong to Sabar community and she get a 35 kg food grains but there is issue of regularity of the PDS food grains. When I asked her about regularity she replied that "dui-teen massi ek bari chaval paye" that means the fair price shopkeeper never provide a food grains at regular [every month] basis. She said that her pension comes in regular to her account and she use that to buy food grains sometimes whereas the NFSA and Jharkhand states "Dakhiya yojana" has mandate to provide this community a food grains at free of cost, and it should be at door step and regular basis. But here the rule of regularity is breches many times and it affects the life many people such as this women. She asked me is there any option for people like her and I was quite because at that moment I don't have a answer for her

---

5 See annexure 5 photograph of sumitra

6 See annexure 6 photograph of Duri Sabar

question. She never use to work due to old age as well as paralyzed body and then I felt that yes there is need of an alternatives which helps her and many more to ensure their food security.

#### Conclusion :-

The people like this women has really need of an policy alternatives because they access the PDS food but if that is irregular then what it makes a impact on their lives.

#### Recommendation :-

All the people like Duri Sabar has to sent at MDM in the school at their villeges which helps them to take cook food once in a day atleast, and it helps reduce their hunger. As well as we have to improve our monitoring mechanism to implement the NFSA with more effective manners.

### 5. The family of 3 minors [Ramchandrapur, Ghatshila block]

This family has only three members and most elder member of the family<sup>7</sup> is only 8 years old her name is Arati Sabar, follows her younger sister is 6 years old and brother is only 5 years old. Their father expired before 8 months and mother left them alone just after fathers death the community members told me about thier monter that “wo kisike sath bhag gaya saab”. When I hearded this I was litrary shocked and I started to think that how could she do that, is she eligible to call a mother herself anymore? But a good news was about these childrens is Birsa Public school at Dhangam, Harnya panchayat adopted them and took a responssibility to their education and food, that is only for during a school days only and at their place no one relatives they have. During the school days they suffer for the food because they can't ask for their food grains and whetger they get it they are not able to cook that. The villegers told me that from last one month their aunt are serve them who's come from a different place but they seen she didn't take care them very well. They ask me with very optimistic eyes that do something for this childres and I replied that I am not a official and I can't do anything, but when I share this situation with the SDO of Ghatshila Mr Amar Kumar sir, he ensure me that he will definetly look into this and he said he will definetly do something.

#### Conclusion :-

The minor people such as this three childrens is not able to take care of themselves and the other community members and villegers are helps them but what else if this people will not helps them and that time what happens to them.

#### Recommendation :-

firstly we have to send these childrens to the child welfare committee and ensure ourselves that they never being a excluded from any welfare atleaste at age of 18 years. Secondly we can took them to the state run residensial school where they can get education as well as all other benefits.

---

7 See annexure 7 for photo of house

# Analysis of all repondents

Initially I had a list of 147 respondent from the East Ghatshila district of the Jharkhand state, it includes 7 villeges of four blocks. Out of that 147 people I was able to interviewed only 30 respondents and that I choose based on accesibility to reach, it might be hard to say that these 30 repondents will represent the entire population of single headed households. Out of these 30 respondents 80 % are female and 20 % are male and on that basis I can say that the conclusion where I reach it's represents the problems that they faced. I divided them on the basis of disability, regularity, sufficiency of food grains and taking helps from someone other. So I present here my analysis based on only that 30 respondent<sup>8</sup>.

- The first criteria for selecting the people those really needs a alternatives that is disability because due to disability they can not cook for themselves and out of my 30 prespondent 20 % peoples are disabled and rest 80 % has no disability. [see figure 1.1]

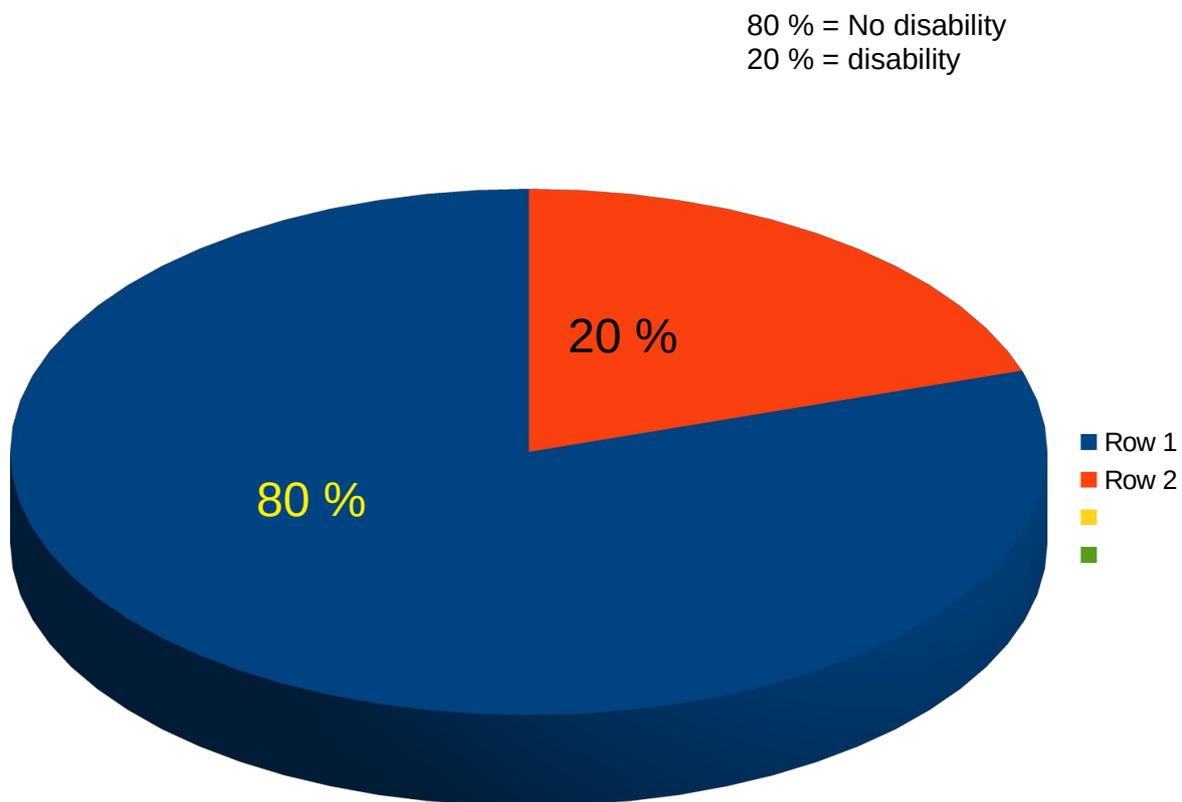

Figure : 1.1 percentage of disability

- second criteria for the identification of eligible single headed households who seeking for an alternatives is that regularity of the food grains because at many places these people facing a severe problem of irregularity and that the ratio is 33.33 % only 66.67 % said that they get food grains at regular basis. [see figure 1.2]

66.67 % = get regural  
33.33 % = get irregural

<sup>8</sup> See annexure 8 for analysis

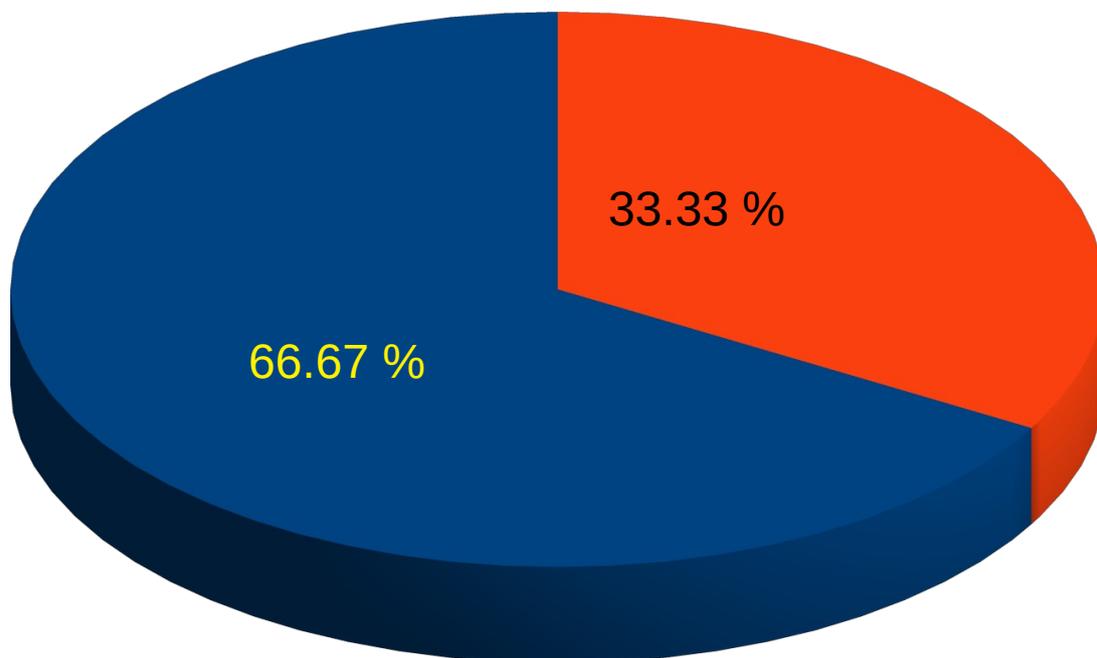

Figure : 1.2 regularity of food grains

- Third and most important aspect for identification of single headed households is sufficiency and it is interlinked with the regularity of the food grains because I observed at many places they faced severe shortage of food grains only because irregularity and it affects their daily food cycle. Out of 30 respondents 80% said that the food grains they get is sufficient for them, 16 % people said that food grains they get is not sufficient for a month and these people mostly belong to PH households where they get 5kg /month, rest 4 % respondent can't say anything whether food grains is sufficient or not.

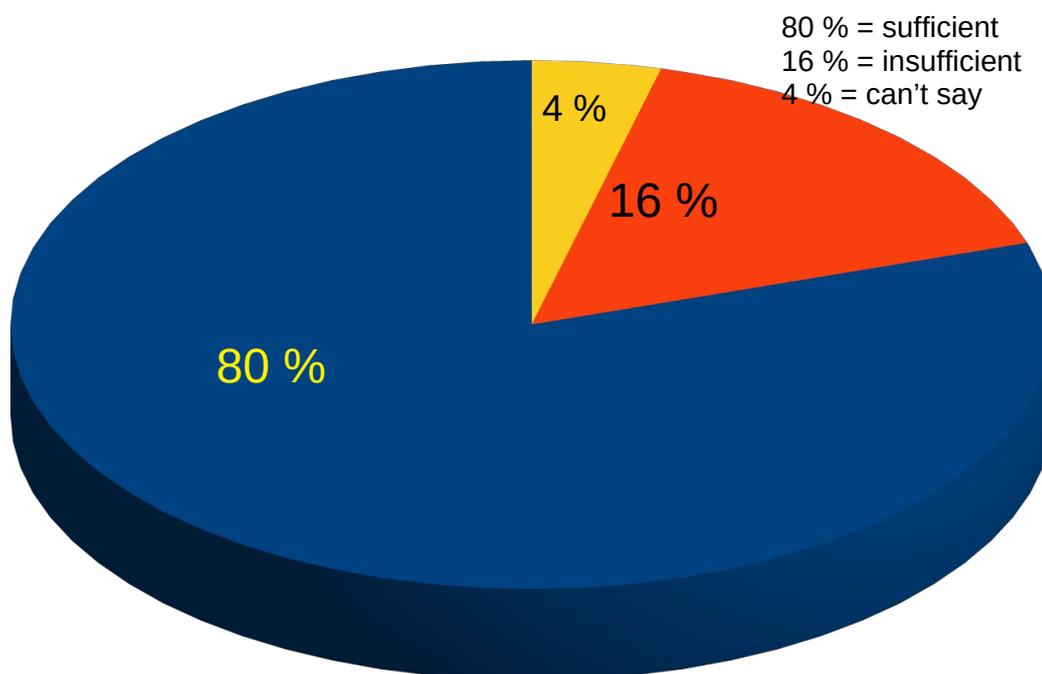

Figure : 1.3 percentage of sufficiency

# Recommendations

On the basis of my field visit and observation I made a case studies and analysis and my recommendations is fully based on that. While recommend a policy alternatives for these single headed households I find some important aspects where we have make some improvement and some are new recommendation which can helps these people to ensure their food security.

## 1. Disability :-

The people those are disabled 20 % here who represent the entire population of the state of Jharkhand, they are not able to cook a food for themselves we can enroll them at nearest school or Anganwadi center from where they can get a cook food. Many of my respondents are happy to take food from there and we can assume that rest of the people from same category also will be happy if they can access a cook food.

## 2. Regularity :-

Many people said that they can't access PDS food grains at regular basis that is 33.33 % of the respondents if we calculate it at large scale for entire state it might be a huge number and out of these 33.33 % respondents near to 10 % people said they doesn't need a alternatives if only they get their food grains regularly because they said their relatives or neighbour will helps them but for that they have to access food grains regularly.

## 3. Sufficiency :-

Sufficiency is might interlinked with regularity but we have to improve distribution mechanism and specially for those who belong to PH households because these people faced severe problem of insufficiency. We have to change their ration cards into AAY

## 4. Over dependency :-

These single headed households are fully depends upon others help due to old age , disability and other reasons we can decrease their over dependency through providing them a cook food at their places.

## 5. Incentives :-

These incentives should be only for those people who are take care of single headed households but incentives should be for only neighbour and not for relatives. Incentives must be a form of extra 2 kg ration per month to care taker and it never been a cash.

[12]

## 6. Enrollment to MDM :-

The single headed households those really need a alternatives we can enroll them at MDM in the school at their places because if they are not able [observations] then it helps them to fullfil their hunger. They can get a nutritious food from a shcools.

## 7. Anganwadi centers :-

Thses centers also able to provide cook food to the single headed households and it is full of nutrition and it is for all days of a week so if shcools are ready to acommodate these people then Anganwadi centers would be a better option rather than set a new mechanism.

## 8. Involvement of panchayat :-

Every panchayat should participate in these chain because they are only stakeholder at ground level who can monitor the entire chain on regularly, the state should encourage them to participate through giving them a extra benefits of other welfare schemes.

## 9. Monitoring and accountability at Ground :-

The Gramsabha can hold the panchayat to accountability for monitoring this chain they have a power of that and if not then we have to improve them also.

#### **Questionnaire for single headed households (AAY,PH)**

<b>Sr.</b>	<b>Details of the respondent</b>	<b>(AAY OR PH)</b>
<b>No 1</b>	<b>Name =</b> Sumitra Sabar ( Ramchandrapur)	<b>AAY</b>
	Age	35-40
	Sex	female
	Caste	--
	From how long have you been alone in the family?	8-10 years.
	What happened - how & why were you single?	Her husband was expired, and her children left her alone.
	If respondent have disability, what kind of it is? Mental, physical or other.	No.
	Are you getting food grains regularly? when did you get food grains last ?	Yes regular, not remember.
	Does any one help you to cook ?	Yes, her relative( Konda Sabar)
	The food grains which provides you is it sufficient for? Are you happy with that?	Yes.
	If you didn't get food grains then what you did?	Can't say anything.
	Had you complaint to anyone? Regarding quality,quantity,irregularity of food grains.	No.
	Do know about online complaint portal?	No(they only ask to dealer)
	What do you think if you get a cooked food at home?/	Yes, she will be very happy to

	you are happy with the current system?	take cooked food at home.
	Additional information.	Her pension not coming regularly, she will be happy to take cooked food at home.

Sr. No	Details of the respondent	(AAY OR PH)
1	<b>Name</b> = Ravi Sabar (Ramchandrapur)	<b>AAY</b> C. NO : 202005837314
	Age	30 Years
	Sex	Male
	Caste	Sabar (ST)
	From how long have you been alone in the family?	5 Months
	What happened - how & why were you single?	Wife expired
	If respondent have disability, what kind of it is? Mental, physical or other.	No.
	Are you getting food grains regularly? when did you get food grains last ?	Yes , regular
	Does any one help you to cook ?	Sister or sister-in-law
	The food grains which provides you is it sufficient for? Are you happy with that?	Yes
	If you didn't get food grains then what you did?	Tell to Mukhiya or FP shopkeeper
	Had you complaint to anyone? Regarding quality,quantity,irregularity of food grains.	Not yet.(NO)
	Do know about online complaint portal?	No.
	What do you think if you get a cooked food at home?/ you are happy with the current system?	He said it will help but there is a time constraint. Happy with current system.
	Additional information.	He has a 2yr girl child, no financial support.

	<b>Details of the respondent</b>	<b>(AAY OR PH)</b>
<b>Sr.</b>	<b>Name</b> = Rabni Sabar (Ramchandrapur)	<b>AAY</b>
<b>No 3</b>	Only 3 minors in the family (2 girls,1 boy)	C.No : 202005836346
1	Age	35-40 years
	Sex	Female
	Caste	Sabar (ST)
	From how long have you been alone in the family?	6 months
	What happened - how & why were you single?	Male expired and Female left the home.
	If respondent have disability, what kind of it is? Mental, physical or other.	NO.
	Are you getting food grains regularly? when did you get food grains last ?	Yes, last month
	Does any one help you to cook ?	Yes, cousin sister and aunt.
	The food grains which provides you is it sufficient for? Are you happy with that?	Yes
	If you didn't get food grains then what you did?	Probably ask to dealer.
	Had you complaint to anyone? Regarding quality,quantity,irregularity of food grains.	No
	Do know about online complaint portal?	No
	What do you think if you get a cooked food at home?/ you are happy with the current system?	Yes, it will help to ensure their food security.
